Summary

I'm web developer. I work as a Front-end engineer mainly but I have experience Python and Ruby.
So I've been working web developer for 8 years.
I'm working in U.S. now.

As a Front-end engineer, I have the skills to create the standard HTML which make it easy to fix any problems that arise later. I try to use new technology to improve UI/UX or maintainability such as new library and new APIs.

As a project manager, I can suggest architecture to make what a client want to get and consider with best team. And I have excellent communication skills with the ability to interact effectively verbally and in writing I also have the ability to lead and manage a team of developers from the beginning of a project to the end.

I have also experience Back-end developer using Django, Ruby on Rails. So I can discuss architecture with them and I can consider about UI/UX and architecture in whole of web service.

I will make good collaboration in your team.

Experience

Apr. 2008 - 2011
